

### Multiple Choice Questions (MCQs)

1. B. It helps analyze and manipulate chemical structures computationally
2. A. By automating molecular similarity and structure analysis
3. B. Reading and processing molecular structure representations
4. A. It can help screen and analyze large numbers of compounds efficiently
5. B. `Chem.MolFromSmiles()`
6. A. `Chem.MolToSmiles()`
7. B. `rdkit.Chem.Draw`
8. A. `AllChem.GetMorganFingerprintAsBitVect()`
9. B. `Chem.AddHs()`
